Guruprakash(1st Year)

About the Event:
This is a web designing competition that tests creativity, UI/UX skills, and logical thinking. Participants will create modern and responsive web interfaces using frontend technologies.
AI tools like ChatGPT are allowed, but participants must understand and explain their work.

Event Description:
The event has two rounds:

- Round 1 – Focuses on design creativity.
- Round 2 – Focuses on functionality and logical implementation.

Participants must complete the task within the given time. The final output should be a clean and responsive frontend application.

Event Details:

- Team Size: Individual or Team of 3
- Total Rounds: 2
- Duration: 30 minutes per round
- Systems will be provided.
- Internet will be provided
- AI tools are allowed

Technologies Allowed:

- HTML, CSS, JavaScript
- React, Angular, Vue
- Bootstrap, Tailwind
- Any frontend framework

Backend is not required.

Topic Allocation Method
To ensure fairness:

- Topics will be prepared before each round.
- Slips will be shuffled.
- Each team will pick one topic randomly.
- The selected topic cannot be changed.

ROUND 1 – Brand to Bento

Task

Design a Bento-style landing page by choosing one company topic.

Round 1 Topics

- Matrix AI
- Tech IO Solutions
- EIO Technologies
- Source Code Solutions
- Code Me Technologies

Requirements

- Follow Bento UI layout
- Minimum 6 blocks
- Use Glassmorphism or Neumorphism style
- No gradient colors
- Page must be scrollable
- Include at least one hover or micro interaction

Round 1 Criteria

- UI Design
- User Experience
- Brand Presentation
- Layout Structure
- Responsiveness
- Interactivity
- Clean Code
- Performance

ROUND 2 – The Master Render

Task

Build a functional single-page application by choosing one system.

Round 2 Topics

- Eco-Dine Smart Menu
- SpotFinder Smart Parking

Requirements

- Responsive design
- Working features
- Proper data/state handling
- At least one interaction
- No gradient colors

Round 2 Criteria

- UI Quality
- UX Flow
- Functionality
- State Management
- Data Handling
- Responsiveness
- Clean Code
- Performance

General Rules

- Start only after instructions are given.
- Pre-built templates are not allowed.
- AI usage is allowed but must be understood.
- Teams must explain their work if asked.
- Plagiarism leads to disqualification.
- Judges' decision is final.
